EDUCATION

Florida International University

Miami, FL

Bachelor of Science in Computer Science

Dec. 2026

Relevant Courses Programming I & II, Discrete Structures & Algorithms, Mobile-App Development, Software Engineering I, Human-Computer Interaction, Computer Architecture, Database Management, Systems Programming

TECHNICAL SKILLS

Languages: Swift, Typescript, Java, Python, C++, SQL, HTML/CSS, Go

Technologies: React, Next.js, Tailwind, Node, WebGL, Zustand, Howler.js, Three.js, Git, neovim

LEADERSHIP

Director of Technology

Jan. – Dec. 2025

- Leading development of **ShellHacks web application** to handle **2,000+applications** and **1,300+participants** for Florida's largest hackathon, implementing **robust architecture** to ensure **zero downtime** during peak usage
- Architecting comprehensive system featuring **specialized dashboards** for hackers, administrators, and volunteers, along with integrated **bulk email service** and **QR code scanning** functionality for event check-ins
- Collaborating with **35+industry partners** including Microsoft, Google, and Meta to integrate sponsorship requirements into platform while creating **detailed documentation** to facilitate developer onboarding

INIT FIU Executive Board

Explore Hardware Technical Lead

Jan. – Dec. 2024

- Led **12+technical workshops** reaching **500+students**, including robotics, Arduino programming, and 3D modeling workshops with average of **30+students**
- Crafted **detailed documentation and materials** for workshops, enabling continued learning beyond sessions
- Established **safety protocols and standards** for hardware lab operations, ensuring compliance with guidelines
- Organized Florida's **largest MLH hackathon**, ShellHacks, attracting **1400+participants** and **30+industry sponsors**

PROJECTS

🔗 Mimir | Go, Next.js, React, TypeScript, Python, WeaviateDB

Knighthacks 2024

- Won ServiceNow Challenge (**1st place** at UCF's Hackathon) by developing an AI-powered documentation platform that streamlines technical knowledge management
- Implemented a scalable backend in **Go** with **WeaviateDB** vector database, implementing **real-time clustering** for intelligent document categorization
- Architected responsive frontend using **Next.js** and **TypeScript**, featuring dynamic search, chat interface, and automated documentation suggestions
- Integrated **OpenAI's GPT-4** for intelligent ticket clustering and automated documentation generation

🔗 SoniDough | Next.js 14, TypeScript, Supabase, Zustand, Tailwind

Nov. 2023 – Jan. 2024

- Made a **full-stack music streaming platform** featuring **OAuth authentication**, liked songs library, and dynamic audio playback
- Constructed **client-side state management** with **Zustand** and **custom hooks**, enabling seamless playlist navigation and audio controls
- Integrated **Supabase** backend for user authentication, song metadata storage, and media file management.
- Crafted responsive UI using **Tailwind CSS** with **custom animations**, achieving mobile-first design.

🔗 Gadget Galaxy | React, HTML, CSS, Three.js, Javascript

Oct. – Dec. 2023

- Led a team of **10+members** to develop **Gadget Galaxy**, a tech product referral platform featuring interactive **3D product showcases** using **React**, **Three.js**, and **WebGL**
- Established **Agile development practices** and conducted bi-weekly code reviews, managing Git workflows and documentation for **4,000+lines of code** across multiple features
- Architected responsive product catalog implementing **dynamic filtering**, **search functionality**, and **shopping cart system**, achieving **sub-second load times** through optimization
- Mentored team members in modern web development practices, including **React**, **Three.js**, and **Git**
