EDUCATION

Florida International University
Bachelor of Science in Computer Science

Miami, FL
Dec 2026

EXPERIENCE

Miami Heat / 601 Analytics

Miami, FL

Software Engineering Intern

Sep 2025 – Jan 2026

- Developed an internal **data deletion request portal** to automate **CCPA compliance workflows** using **Angular**, **TypeScript**, **C#**, and **.NET**, reducing request processing friction and improving turnaround time
- Integrated tool into existing analytics and management platform, collaborating with engineers to ensure compatibility with production systems and data pipelines
- Partnered cross-functionally with **PMs**, **legal counsel**, and **Director of Business** to define project scope, compliance requirements, and edge case handling

Data Analytics/Machine Learning Intern

May – July 2025

- Developed a **personalized shopping recommendation system** using **two ML models** — Apriori-Rule Based Mining (ARM) at **36.5% F1** and a hybrid Content-Based/Collaborative Filtering model at **60.2% accuracy** — to improve online retail conversion rate
- Processed **5 datasets totaling 600,000+ rows** across **8 years** of customer data using **Python**, **Pandas**, and **Dask** for feature engineering and **RFM-based customer segmentation**
- Engineered hybrid system combining **TF-IDF**, **cosine similarity**, and **PyTorch neural networks**; built stakeholder visualizations using **Plotly Express** and **Seaborn**

LEADERSHIP

INIT FIU Executive Board

Director of Technology / Technical Project Manager

Jan 2025 – Dec 2026

- Spearheaded development of **ShellHacks web application** to handle **2,000 + applications** and **1,300+ participants** for Florida's largest hackathon, implementing **robust architecture** to ensure **zero downtime** during peak usage
- Implement comprehensive system featuring **specialized dashboards** for hackers, administrators, and volunteers, along with integrated **bulk email service** and **QR code scanning** functionality for event check-ins
- Complete migration from Next.js to Astro, Preact, TursoDB (SQL/SQLite) and Go tech stack to enhance application performance, maintainability, and simplify future development cycles

Explore Hardware Technical Lead

Jan – Dec 2024

- Designed and delivered **12+ hands-on hardware workshops** (robotics, Arduino, 3D modeling) for **500+ students**, producing reusable documentation and materials for future leads
- Co-organized **ShellHacks**, Florida's largest hackathon, coordinating logistics across **1,400+ participants** and **30+ industry sponsors**

PROJECTS

🔗 butterfly-IOT Garden | C++, React, ESP32, Raspberry Pi, InfluxDB, Three.js

Aug – Dec 2024

- Led **10+ member team** to build a cost-effective IoT system for FIU's GCI Garden, designing a distributed sensor network using **ESP32 nodes**, **Raspberry Pi**, **Mosquitto MQTT**, **Node-RED**, and **InfluxDB** for real-time environmental monitoring
- Engineered a **public visualization portal** with **React** and **Three.js** alongside **Dockerized infrastructure** on Raspberry Pi, supporting **50+ concurrent sensor streams** and internal analytics via **Grafana**

🔗 Mimir | Go, Next.js, React, TypeScript, Python, WeaviateDB

Knighthacks 2024

- Won **ServiceNow Challenge (1st place)** at UCF's KnightHacks by building an AI-powered documentation platform, architecting a **Go** backend with **WeaviateDB** vector database for real-time document clustering and categorization
- Engineered responsive frontend in **Next.js** and **TypeScript** with dynamic search and chat interface, integrating **OpenAI GPT-4** for automated documentation generation and intelligent ticket clustering
